## 1 GENERAL DESCRIPTION

CEM\_04 is a smart energy meter that controls and measure the energy consumed up to four independent users, logging the data for billing.

It can be connected in a network of meters allowing the complete management of electrical supply of small villages. The network can be managed by a PLC or a PC than can select the production of energy, choosing among different sources, renewable or traditional and monitoring the plant efficiency by both local or remote tools.

## 2 HARDWARE FEATURES

Wide power supply range: 160..250 Vac
Up to 1KW per user power control
One global AC power input an four AC power outputs, relè controlled (one per user)
User friendly HMI with wide display and four keys
Two RS485 ports for network connection
64 Kbyte memory for data logger

## 3 SOFTWARE FEATURES

Four independent energy measurement, each per user
Definition of four time slots with different energy cost and single slot and single user independent accounting.
Single user prepaid credit. The credit is decreased on time slot basis, and energy supply is stopped when reaches zero
Four partial energy counter for hour by hour energy consumption log
Four partial energy counter for energy source generation log
Programmable Immediate Threshold to monitor the instantaneous power
Programmable Fifteen minute threshold to monitor the mean energy

## 4 APPLICATIONS

Connecting a meter network to a KERNEL PLC or DLC allow a complete management of a production / distribution energy plant. The PLC has dedicate functions to :

- Assign a time slot cost to every counter
- Assign a prepaid credit to every single user of single counter.
- Automatic daily log of single and user single time slot energy consumed
- Automatic hourly log of total energy delivered
- Read/clear of partial energy counters to check the hourly production of energy and different energy source monitoring
- Time and date meter synchronization
- GPRS modem or Ethernet connection for remote management

## 5 DETAILED DESCRIPTION

The meter is designed to connect up to four users, it is powered by 230 Vac and the same Vac (phase) is connected to an input connector, the common of the four outputs relays, meanwhile the neutral is connected directly to outputs, so the output Vac phase is driven by the four outputs relays, controlled by the firmware.

An output relays is enabled when :

- the user is enabled
- the user has residual prepaid credit
- the user has not exceeded one of the Threshold

If one of the Threshold is exceeded the output is disconnected for a programmable time, after the time is elapsed the output is reconnected and the cycle is repeated.

When the corresponding output is connected the meter measure the power supplied to the single user and accumulate it to count the energy supplied, meanwhile it decrements the prepaid credit on the basis of the current time slot.

At the same time the meter updates two independent counters, one can be read hourly by the PLC to calculate and log the total amount of energy produced in a hour and the other can be read every time the PLC decide to switch from one source of energy to another, to keep track of the energy produced by every energy source.

When the complexity of a plant increase the PLC can be programmed to manage the different energy sources, renewable or traditional, switching or mixing one to another, choosing time by time the best and cheaper energy source.

Every function can be controlled on the PLC HMI in the control room or by remote connection using a GPRS modem or Ethernet connection or bridge.

## 6 DATA MEMORY MAP

DATA	RO or R/W	TYPE	Description
DATA.00	RO	WORD	Current Page
DATA.01	R/W	WORD	Command
DATA.96	RO	WORD	User 1 Instantaneous Current [A]
DATA.97	RO	WORD	User 2 Instantaneous Current [A]
DATA.98	RO	WORD	User 3 Instantaneous Current [A]
DATA.99	RO	WORD	User 4 Instantaneous Current [A]
DATA.108	RO	WORD	User 1 Instantaneous Power [1/10 W]
DATA.109	RO	WORD	User 2 Instantaneous Power [1/10 W]
DATA.110	RO	WORD	User 3 Instantaneous Power [1/10 W]
DATA.111	RO	WORD	User 4 Instantaneous Power [1/10 W]
DATA.128 / 129	RO	FLOAT	User 1 WATTSEC
DATA.130 / 131	RO	FLOAT	User 2 WATTSEC
DATA.132 / 133	RO	FLOAT	User 3 WATTSEC
DATA.134 / 135	RO	FLOAT	User 4 WATTSEC
DATA.144 / 145	R/W	FLOAT	User 1 HOURLY Partial Counter
DATA.146 / 147	R/W	FLOAT	User 2 HOURLY Partial Counter
DATA.148 / 149	R/W	FLOAT	User 3 HOURLY Partial Counter
DATA.150 / 151	R/W	FLOAT	User 4 HOURLY Partial Counter
DATA.152 / 153	R/W	FLOAT	User 1 SOURCE Partial Counter
DATA.154 / 155	R/W	FLOAT	User 2 SOURCE Partial Counter
DATA.156 / 157	R/W	FLOAT	User 3 SOURCE Partial Counter
DATA.158 / 159	R/W	FLOAT	User 4 SOURCE Partial Counter

### Legend :

RO = Read Only DATA

R/W = Read / Write DATA

## 7 EEPROM MEMORY MAP

DATA	EE	TYPE	Description
TO BE DEFINED	EE	WORD	Output disconnection time when threshold reached
TO BE DEFINED	EE	WORD	Immediate Threshold
TO BE DEFINED	EE	WORD	Fifteen minute Threshold
TO BE DEFINED	EE	FLOAT	User 1 Prepaid Credit
TO BE DEFINED	EE	FLOAT	User 2 Prepaid Credit
TO BE DEFINED	EE	FLOAT	User 3 Prepaid Credit
TO BE DEFINED	EE	FLOAT	User 4 Prepaid Credit
TO BE DEFINED	EE	FLOAT	Time Slot 1 Energy Cost
TO BE DEFINED	EE	FLOAT	Time Slot 2 Energy Cost
TO BE DEFINED	EE	FLOAT	Time Slot 3 Energy Cost
TO BE DEFINED	EE	FLOAT	Time Slot 4 Energy Cost

TO BE DEFINED	EE	FLOAT	Slot 1 User 3 Energy Consumed
TO BE DEFINED	EE	FLOAT	Slot 1 User 4 Energy Consumed
TO BE DEFINED	EE	FLOAT	Slot 2 User 1 Energy Consumed
TO BE DEFINED	EE	FLOAT	Slot 2 User 2 Energy Consumed
TO BE DEFINED	EE	FLOAT	Slot 2 User 3 Energy Consumed
TO BE DEFINED	EE	FLOAT	Slot 2 User 4 Energy Consumed
TO BE DEFINED	EE	FLOAT	Slot 3 User 1 Energy Consumed
TO BE DEFINED	EE	FLOAT	Slot 3 User 2 Energy Consumed
TO BE DEFINED	EE	FLOAT	Slot 3 User 3 Energy Consumed
TO BE DEFINED	EE	FLOAT	Slot 3 User 4 Energy Consumed
TO BE DEFINED	EE	FLOAT	Slot 4 User 1 Energy Consumed
TO BE DEFINED	EE	FLOAT	Slot 4 User 2 Energy Consumed
TO BE DEFINED	EE	FLOAT	Slot 4 User 3 Energy Consumed
TO BE DEFINED	EE	FLOAT	Slot 4 User 4 Energy Consumed

## 8 CONTACTS

### GENERAL

Tel: 059 469978  
website: [www.kernelgroup.it](http://www.kernelgroup.it)  
e-mail: [info@kernelgroup.it](mailto:info@kernelgroup.it)

### COMMERCIAL

Sig.ra Linda Mammi  
Tel: 059 469978 Int. 207  
e-mail: [sales@kernelgroup.it](mailto:sales@kernelgroup.it)  
Skype: mammi.kernel

### ADMINISTRATION

Sig.ra Paola Morandi  
Tel: 059 469978 Int. 201  
e-mail: [amministrazione@kernelgroup.it](mailto:amministrazione@kernelgroup.it)  
Skype: morandi.kernel

### PURCHASING and PRODUCTION

Sig. Stefano Catuogno  
Tel: 059 469978 Int. 204  
e-mail: [produzione@kernelgroup.it](mailto:produzione@kernelgroup.it)  
Skype: catuogno.kernel

### TECHNICAL OFFICE

Sig. Alessandro Muratori  
Tel: 059 469978 Int. 205  
e-mail: [alessandro.muratori@kernelgroup.it](mailto:alessandro.muratori@kernelgroup.it)  
Skype: muratori.kernel

Sig. Enrico Bellentani  
Tel: 059 469978 Int. 209  
e-mail: [support@kernelgroup.it](mailto:support@kernelgroup.it)  
Skype: support.kernel

Sig.ra Francesca Borghi  
Tel: 059 469978 Int. 208
